

Streamlining the Notes Domino environment and upgrading soon-to-be unsupported releases of the software

PROJECT

Domino 6 upgrade and domain rename

MARKET SECTOR

Manufacturing.

PROJECT OBJECTIVE

Following a change of company name and to ensure that the software in use is current, this company upgraded the Domino infrastructure to Domino 6 and renamed the Domino domain and certifier.

Obstacles needed to be overcome

- Create security policies to configure the new clients to accept the name changes.
- Test the interoperability between the two domains and to test the client deployment
- Ensure that the person documents exist in the new environment.
- Initiate a user rename with no user impact

Description of Solution

- Design and Implementation of the new Domino 6 infrastructure
- Provision for application testing to be undertaken internally
- Integration of the existing infrastructure into the new infrastructure
- Design and documentation of the user migration procedures
- Single page user reference sheet
- User migration and upgrades.

Technologies Used

Lotus Domino 6.

Benefits to the Customer

Increased stability and high availability. Provided the company with concurrent R5 and Domino 6 environments to allow full application testing and co-existence. The upgrades will ensure there is a current and fully vendor supported IBM Domino environment for their business units and critical sales applications
